DETAILED ACTION

Response to Amendment

The amendments do not conform with the reissue guidelines as set forth in the 37 CfR 1.174 see also MPEP 1400. MPEP 1453 (D) states: *An amendment of a "new claim" (i.e., a claim not found in the patent, that was previously presented in the reissue application) must be done by presenting the amended "new claim" containing the amendatory material, and completely underlining the claim. The presentation cannot contain any bracketing or other indication of what was in the previous version of the claim. This is because all changes in the reissue are made vis- à-vis the original patent and not in comparison to the prior amendment.* Although the presentation of the amended claim does not contain any indication of what is changed from the previous version of the claim, applicant must point out what is changed in the "Remarks" portion of the amendment. Also, per 37 CFR 1.173(c), each change made in the claim must be accompanied by an explanation of the support in the disclosure of the patent for the change.

Therefore, to conform with the MPEP, any claim that is not in the patent (whether presented earlier or whether presented as a new claim not presented previously in the reissue), must be completely underlined, and presented as a new claim. Then the applicant must point out the changes in the remarks portion of the amendment and explain the support in the disclosure of the patent for the change.
